8. Source code for the used actions

8.1. Create content package

Send Slack Message

```
System.log("Starting [Send Slack Message - Init]...");
System.log("\tSlack Message: " + slackMessage );
System.log("\tCreating content package...");
content = '{"text":"' + slackMessage + '"}';
System.log("\tContent package will be: " + content);
System.log("Finished [Send Slack Message - Init]");
```
